Traders invariably take profits and decrease

their holdings prior to a double holiday, and in

this respect to-day's operations on the Stock

Exchange were not exceptions. At the same time, however, yesterday's advance attracted a number of new buying orders to the market, and while realizing sales were heavy, they were in great part offset by purchases by people who believed that the profits in the stock market had not yet reached the limit. As a rule, the mapority of issues closed at fractional net gains St. Paul at a not loss of a per cent being the chief exception. To-day's speculation was quieter and more conservative than that of the last two days, and small operators showed a more sensible disposition in their transactions, many of them

taking their profits and others reducing holdings which because of the narrow margins back of them had too many elements of danger for safe speculation. Noteworthy strength was shown by the anthracite shares, due perhaps to the expectation of a speedy settlement of the soft coal strike. Dealings in Reading common aggregated 20,000 shares, or about 4,000 shares more than in the full session yesterday, and sentiment appeared particularly bullish on this property, as well as upon others of the coalers which have not enjoyed the same proportion of gain as witnessed in the large majority of listed issues. Northern Pacific issues and Norfolk and Western were also strong features. Missouri Pacific advanced to 39% on the splendid showing made by the company for the fourth week in August, when its gross earnings increased \$207,000, as compared with the same week last year, or a gain from January 1 of \$894,000. The grain movement on the Western railroads in August was the largest ever recorded. Receipts at Chicago aggregated 59,555 carloads, an increase of 25,723 cars over the same time last year, 36,757 cars over 1895, and 27,271 cars over 1894. Burlington handled over 24 per cent of the entire business, with Rock Island second at 14.6 per cent, Illinois Central third, the Alton fourth and St. Paul fifth. Burlington's gain over last year was 1,080 carloads.

For a half-holiday to-day's operations in stocks were very large, amounting to 302,942 shares, of which Sugar Refining, Rock Island, St. Paul, Northern Pacific preferred, Reading, Atchison preferred and Western Union furnished 162,003 shares. Northern Pacific, on sales aggregating 39,200 shares, and at a net gain of 1½ per cent, was the most active stock on the list. Good buying characterized an active market for railway bonds. Atchison's July statement, published to-day, showed an increase in gross earnings of \$229,703, and a decrease in the New-York banks the week being estimated at \$4,000,000. The weekly statement of the associated banks reflected the outward movement of money in a reduction of cash holding and a loss in surplus reserve, while the improvement in mercantile business of danger for safe speculation. Noteworthy strength was shown by the anthracite shares,
